

➤ ECCT Mission and Vision Statment

The Company understands that its activities affect the environment and the communities in which we operate. We believe that we have a responsibility to identify and manage these impacts as effectively as possible. We are committed to continually improving our environmental performance and moving towards best practices in corporate sustainability.

➤ Environmental Management Team

Each project manager is responsible the implementation and communication of this policy, they shall also be responsible for establishing and monitoring performance against appropriate industry benchmarks. The Company may seek advice from external specialists as and when required. All employees are informed of the policy and are encouraged to contribute to the achievement of its objectives.

ECCT aims to:

- Minimize the environmental impacts of our existing operations and ensure that the environmental impacts of new operations are fully assessed and minimized prior to their introduction;
- Reduce consumption of materials in all operations, where practicable, to re-use rather than dispose of materia where possible, and promote recycling and use of recycled materials;
- Seek to improve the energy efficiency of buildings and to manage energy wisely in all operations;
- Introduce programs that aim to minimize waste, dispose of waste and effluents in a responsible manner.

- Promote the ownership and control of environmental issues at business level.

Provide the necessary training and support in order to ensure that staff fulfills their requirements;

➤ Environmental Management System

The company's Environmental Management System (EMS) has the following components and objectives. As additional areas for monitoring are identified, they will be integrated into the EMS.

- Water: We seek to keep rivers or canals clean & reduce the amount of water used.
- Dust: ECCT always avoid air pollution by dust, spreading water over working area during earth works is one example.
- Energy: we aim to reduce the consumption of energy which is used for office lighting, heating and cooling systems and for the operation of office equipment and kitchen appliances.
- Paper: We seek to reduce the amount of paper used and to increase the amount of paper that is recycled. ECCT will encourage staff to re-use or recycle paper.
- Transport: Transport is a major source of CO2 emissions. To reduce these emissions the company insures that the owned or subcontractors equipment & cars' engines are always in good condition.
- Involvement in the Community: ECCT has been fostering good relations with the community. ECCT will identify any specific community areas of concern on which ECCT's business has an impact. If so, ECCT is willing to work towards integrating these concerns into its EMS procedures and will work to resolve them.
